

Added Innsbruck Foehn Diagnostics

We are glad to announce that the Innsbruck foehn diagnosis is now accessible from the outside on ertel2:online. The ["foehn" menu button](#) leads you to the page where you can access current [foehn classifications](#), a statistical model to probabilistically diagnose if there is/was foehn or not.

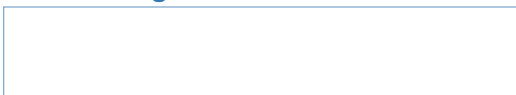

GFS forecasts

Accessing the latest GFS deterministic forecasts here! We are updating it four times a day. With the interactive interface it should be easy to navigate through all the data we are offering. Have fun!

Sounding data

View and compare WMO40 sounding data. The process is made by your browser which can take older machines.

WB infos

The page offers the most important information for our students at the Institute of Meteorology and Geophysics in Innsbruck.

Wetterturnier

Wetterturnier.de is a wonderful place to make weather forecasts and match with other people out there. One of the basic ideas behind the online version of ertel2 is and was to offer our students and you easy access to the data you need therefore. Interested? Check it out!
